TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++

Frontend: React.js, Vite, Next.js, HTML, CSS, Tailwind CSS, React Hook Form, Responsive Design, State Management

Backend: Node.js, Express.js, REST API Design, RESTful APIs, JWT Authentication, Authorization, bcrypt, Multer, Nodemailer

Databases: MySQL, SQL, MongoDB

Security & Tools: Role-Based Access Control (RBAC), Helmet, CORS, Rate Limiting, HPP, Git, GitHub, Postman, Docker

DSA: 500+ problems solved — LeetCode, GeeksforGeeks, CodeChef, Codeforces

EDUCATION

Indian Institute of Information Technology Tiruchirappalli (IIIT Trichy)

Nov 2022 – Apr 2026

B.Tech, Electronics & Communication Engineering — CGPA: 8.54 / 10

Tiruchirappalli, TN

WORK EXPERIENCE

Vakrangee Limited – Software Engineer Intern | Full Stack Developer

Dec 2025 – Present

React.js · Node.js · Express.js · MySQL · REST APIs · JWT Authentication · Git · GitHub

On-site – Mumbai, MH

- Architected a full-stack Employee Onboarding System using React.js, Node.js, and MySQL with 3-tier Role-Based Access Control (RBAC) — Employee, HR Admin, HR Super Admin — eliminating paper-based onboarding workflows across the organisation.
- Engineered secure backend systems: JWT authentication, bcrypt password hashing, Multer document upload/verification pipelines, and automated stage-progression logic reducing manual HR intervention across multi-step compliance workflows.
- Spearheaded frontend development of Vakrangee × Jio Payment Bank customer onboarding portal (React.js), integrating third-party REST APIs within a 6-engineer cross-functional team to enable digital bank-account opening for agents nationwide.
- Implemented 30+ field-level form validations using Zod and Yup schemas with custom regex patterns and real-time error-handling flows, reducing invalid data submissions and improving production form success rates.
- Delivered PDF generation, audit logging, document management, and Git/GitHub feature-branching workflows; collaborated on code reviews and CI integration within an agile development environment.

PROJECTS

VaayuGo — Full Stack Multi-Vendor Marketplace

GitHub

React.js · Node.js · Express.js · MySQL · Sequelize ORM · Sharp · node-cron · jsPDF

- Designed and shipped a production-grade full stack multi-vendor marketplace with 3-role RBAC (Admin, Shopkeeper, Customer), JWT-based authentication, real-time order tracking, cart management, and role-specific dashboards.
- Orchestrated backend systems including scheduled financial settlement generation, penalty engine, discount rules, normalised MySQL database schema, RESTful API layer, and bulk CSV/ZIP upload processing.
- Configured cron-job automation for settlement cycles, file cleanup, unverified-account expiry, and shop-status syncing; integrated Sharp for server-side image optimisation and pdf-lib for invoice generation.

StreetBite Task Portal — Employee Task Management Portal

GitHub

React.js · Node.js · Express.js · MySQL · JWT Authentication · RBAC · Framer Motion

- Developed an end-to-end task management platform with 5-stage automated status transitions (creation → assignment → execution → review → completion) and real-time admin/employee dashboards, replacing manual email-based workflows.
- Secured the API layer with parameterised SQL queries (SQL injection prevention), JWT-based RBAC, bcrypt, and isolated Multer upload directories — audit-ready task execution with structured document submission/verification flows.

E-Commerce Platform — Product Catalog & Order Management

GitHub

Next.js · Node.js · Express.js · MySQL · Express-rate-limit · Axios

- Built a full stack e-commerce platform with Next.js SSR, 2-tier admin system (main_admin / admin), multi-variant product catalog, cart, wishlist, checkout, order tracking, and return/exchange management.
- Hardened the API with 6-layer security: Helmet, rate limiting (1000 req/15 min), XSS sanitization, HPP prevention, CORS, and JWT token blacklisting on logout — demonstrating security-first engineering across the entire backend.

LEADERSHIP & EXTRACURRICULAR

President — Entrepreneurship Cell, IIIT Trichy

Jan 2023 – Apr 2026

- Led 10+ workshops and 7 speaker sessions for 300+ participants; grew membership and annual engagement by 30% through partnerships with founders and investors.

Overall Coordinator — Training & Placement Cell, IIIT Trichy

May 2024 – May 2025

- Coordinated end-to-end campus placements for 100+ students across 15+ companies, managing recruiter relations and on-campus drive logistics.
